

MAR 5 1973

Honorable Stansfield Turner  
Director  
Central Intelligence Agency  
Washington, DC 20505

Dear Admiral Turner:

The U.S. Government Mobile Radiotelephone System operated by the Federal Preparedness Agency (FPA) has become overloaded. An inability to access the system because of busy conditions has become a critical problem.

I am seeking your assistance in ensuring that all individuals who use the mobile radiotelephone units are advised that telephone calls to or from these units should be limited to essential communications. Your cooperation in this effort will help us to provide better service. For your information, system usage during the period July - December 1978 for the unit(s) assigned to your agency is reflected on the enclosed chart.

All mobile radiotelephone users should remember that this system is NON-SECURE and can easily be monitored by anyone using readily obtainable radio equipment. Classified or sensitive information must, therefore, not be discussed over this system.

Sincerely,

  
JOSEPH A. MITCHELL  
Director

Enclosure
